ELIAS RORO

Software Quality Engineer | Data Quality & Automation Specialist | IT Coordinator

Kitchener, Ontario, Canada | +1 (226) 600-6986 | eliassaychelem@gmail.com

LinkedIn Profile | GitHub Repository

PROFESSIONAL SUMMARY

Results-driven **Software Quality , Data Engineer** and **IT Coordinator** with solid experience validating complex enterprise data pipelines, multi-layer applications, and automated software testing frameworks. Strong expertise in end-to-end data validation, ETL/ELT pipeline verification, Oracle FCCM/OFSAA systems, and API automation using Java, Python, SQL, Selenium, and RestAssured. Demonstrated success building automated test suites, executing BDD feature specs, and enforcing rigorous quality standards in fast-paced financial and enterprise technology environments.

CORE COMPETENCIES

- **Quality Assurance & Testing:** Automated Testing, System Integration Testing (SIT), BDD / TDD, Regression Testing, Test Data Management, Defect Life Cycle Management.
- **Languages & Frameworks:** Java, Python, JavaScript, SQL, C#, C++, React.js, ASP.NET, HTML5, CSS3, PHP.
- **Automation & QA Tools:** Selenium WebDriver, Cucumber, RestAssured, PyTest, JUnit, Postman, Jira, Git/GitHub.
- **Databases & Data Platforms:** Oracle SQL Developer, Microsoft SQL Server, PostgreSQL, MySQL, Oracle FCCM/OFSAA, Azure Data Services.
- **CI/CD & Environments:** Jenkins, Docker, Git, Google Workspace, Windows, Linux, Agile/Scrum methodologies.

PROFESSIONAL EXPERIENCE

TD Bank | Toronto, ON

Senior Data Quality & Software Quality Engineer

Nov 2023 – Sep 2026

- Led quality assurance and test validation for high-scale enterprise data pipelines, financial compliance systems (Oracle FCCM/OFSAA), and core banking workflows.
- Designed, executed, and maintained comprehensive automated test suites using Java, Selenium, Cucumber, and RestAssured to validate REST APIs and data integrity.
- Developed complex SQL validation scripts across Oracle SQL Developer and MS SQL Server to ensure 100% data accuracy across ETL/ELT data ingestion layers.
- Partnered closely with cross-functional Agile teams (Developers, Data Architects, Business Analysts) to refine user stories, define acceptance criteria, and streamline release cycles.
- Managed end-to-end defect tracking and reporting in Jira, significantly reducing production defect leakage and improving sprint delivery velocities.

Viessmann Manufacturing | Waterloo, ON

IT Coordinator & Web Developer

Jan 2022 – Nov 2023

- Developed, maintained, and optimized corporate web applications and internal portals using HTML5, CSS3, JavaScript, PHP, and RESTful APIs according to corporate standards.
- Conducted functional, performance, and cross-browser quality testing across desktop and mobile application platforms.
- Administered enterprise business systems including SAP ERP, Google Workspace, and network infrastructure, supporting 100+ active users.
- Managed IT onboarding/offboarding workflows, hardware provisioning, user permissions, and technical support ticketing system.

- Spearheaded process improvement projects that automated manual administrative workflows and optimized internal IT resource tracking.

Create International Tech | Kitchener, ON

Web Developer (Internship)

Jun 2019 – Aug 2020

- Built and deployed responsive web interfaces and core features for startup web applications using HTML, CSS, JavaScript, and PHP.

- Performed front-end unit testing and usability evaluations to identify and resolve UI bugs prior to client release.

Link Picnic Festival Org | Waterloo, ON

Volunteer Web Developer

Jun 2019 – Jan 2020

- Designed, developed, and maintained the official web portal for the non-profit organization.

- Ensured platform responsiveness, accessibility, and database management for event registration systems.
